Nature made Australia unique. Quarantine keeps it that way.

Australia's remoteness created an environment unlike any other on Earth. Quarantine helps protect it.

Food, plant cuttings, seeds, nuts or anything made of wood, plant or animal material from overseas could introduce some of the world's most serious pests and diseases into Australia.

Failing to declare quarantine items on arrival in Australia could devastate our agriculture and tourism industries and our unique environment.

Don't spoil the world's most unspoilt country. To find out what you can and cannot bring back into Australia call AQIS on **1800 020 504** or visit our website at **www.aqis.gov.au**
